

Centre Tower Refurbishment, Croydon

The refurbishment of the top five floors of the Centre Tower was designed and project managed by us for our new face and home in Croydon.

The original late 1960s office block stands in the middle of the Whitgift Shopping Centre, Croydon's premier shopping mall, and posed a challenge in the logistics of refurbishing an occupied building.

The extensive refurbishment programme saw the gutting of the interiors with a new reception, conference rooms and executive suites on one floor and open plan offices with meeting rooms on the remaining floors. This also incorporated a data communication room and reprographics area.

The main works consisted of a new and refurbished ventilation system, a new data communication installation, upgrading of the toilets, provision of the disabled toilets, shower facilities and tea point areas. Video conferencing facilities in the conference and meeting rooms and new interior fittings provide up to date modern facilities.
