

## PROJECT PROFILE

## Renfrewshire School's PPP

### Scope of Project

Our parent company, Carillion carried out the £100 million new build project on nursery, primary and secondary schools for Renfrewshire Council as part of a joint venture with Amey and Bank of Scotland Corporate to provide state of the art facilities for over 6,000 children located in Paisley, Linwood and Johnstone. Construction was completed in December 2007. Carillion also was expected to invest some £4 million of equity in the Special Purpose Concession company.

Carillion Building won the award for the Best Public Safety Initiative on 18th May 2005 at the UK health and Safety Awards for 2005 for their submission on the approach to public health and safety in the Renfrewshire Schools Project.

“Our integrated approach to the provision of educational solutions to meet a wide variety of needs is designed to provide optimum flexibility in the constantly evolving world of education. The provision of ten new facilities across nine sites through this public-private partnership will create first class accommodation to meet the combined needs of full-time education and community learning.”

Schal were the BREEAM for schools assessors for the school's, BREEAM met the targets set down by DCSF of Very Good

Schal have carried out workshops with the whole design team to assess where the team was at the initial stages and to give guidance as to improvements to raise the standard.
