

Queen Alexandra Hospital – Interactive Health & Safety CD

We were tasked to provide an Interactive CD which would include 3D visualisation, animation and interactive content for both Children and Adults in this Health & Safety project. This involved modelling and creating a 3D character called 'Nelson', who could convey the Carillion Health and Safety message successfully to children and an adult Health and Safety message which would be capable of being understood Internationally.

THE RESULT

The final Interactive CD managed to encompass all the necessary features and more like games, understandable and engaging content, an easy to use interface and across platform usage.

The overall project has been highly successful, contributing to the development of Health and Safety within Carillion. The success of the CD has also made it a contender for the Carillion Health and Safety Awards.
